

SUMMARY

Recent Information Technology graduate with a strong foundation in networking, system administration, cybersecurity, and database management. Skilled in troubleshooting technical issues, supporting end users, and applying IT solutions in real-world projects. Hands on experience with Windows Server, Active Directory, SQL, and cloud platforms (Azure, AWS). Strong problem-solver with excellent communication skills and a commitment to continuous learning. Seeking an entry level IT role to contribute technical expertise and grow within a dynamic team.

PROFESSIONAL SKILLS

- Networking
- Operating Systems
- Troubleshooting
- Technical Support
- Customer Service
- Cloud Computing
- Database Management
- Version control
- Team Collaboration

WORK EXPERIENCE

Equipment and Technology

Jan 2025 - Present

Epic Universal

ORLANDO, FL

- Assisted in the unpacking, inventory, and setup of technical equipment including monitors, kiosks, handheld devices, and scanners.
- Demonstrated strong problem solving skills, resolving issues efficiently and effectively
- Contributed innovative ideas and solutions to enhance team performance and outcomes.
- Approached customers and engaged in conversation through use of effective interpersonal and people skills
- Ensured equipment was functional, safe, and aligned with operational standards before opening phases.

Front End Developer

Aug 2024 - Jan 2025

Shawarma Brothers

ORLANDO, FL

- Built responsive web pages optimized for different devices.
- Coordinated installation of software systems and collaborated with user experience team on design and implementation of new features.
- Worked in team environments to produce high-quality programs and applications for various industries.
- Collaborated with a team of designers and developers, creating mockups with Figma and utilizing JavaScript to ensure robust, scalable code for a seamless user experience.
- Managed version control using Git, contributing to a streamlined development process Technologies Used: React, JavaScript, Firebase, AI APIs, Figma, Git.

Networking

Projects

ORLANDO, FL

- Configured and managed virtual networks in lab environments, including routers, switches, and firewalls.
- Set up and administered Windows Server with Active Directory, user accounts, and group policies.
- Troubleshot connectivity issues and implemented network security best practices.

Database Management

Projects

ORLANDO, FL

- Designed and built relational databases using MySQL and SQL Server.
- Wrote queries, joins, and stored procedures to manage and analyze data.
- Developed database-driven projects integrating front-end applications with backend systems.

Cloud Computing

Projects

ORLANDO, FL

- Deployed virtual machines
- Practiced cloud networking and identity management in lab exercises.
- Compared cloud vs. on-premise solutions as part of IT infrastructure coursework.

EDUCATION

Bachelors of Science: Information Technology

University of Central Florida

Aug 2025

Orlando, FL
